

Currently running content operations for an adult digital-media client. Previously seven years in software engineering roles. Earlier, a partner and I ran a search-driven adult web publishing network: SEO, SEM, purchased traffic, and link development. I do both the search work and the engineering. Fully remote since 2019.

Where the search work started: a network of adult web properties I built and ran with one partner. Full entry at the bottom of this resume.

TECHNICAL SKILLS

SEO & WEB

SEO, SEM, link development, purchased traffic, analytics reporting, split testing, performance, accessibility, HTML5, CSS3

ENGINEERING

JavaScript, TypeScript, Python, Go, React, Redux, Node.js, REST APIs, MongoDB, SQLite, Git, GitHub Actions, Grafana, Kibana

EXPERIENCE

Content Operations Contractor // FCI (Accretive Technologies); Remote

07.2024 - Present

- Manage high-volume adult digital-media content workflows to established quality and editorial standards; identify duplicates, technical defects, and irregularities before delivery.
- Built Python image-processing and review tooling, browser extensions for capture and curation, and automated duplicate detection.

Full-Time Trading // Personal Capital

09.2022 - 06.2024

Traded listed options and futures.

Senior Software Engineer // iStreamPlanet; Seattle / Remote

06.2018 - 01.2022

- Built self-service dashboards for scheduling live events, advertising, and pre-recorded content on a large-scale video platform; created **Pebble**, an open-source React design system, and Go/Node.js APIs on Auth0 and MongoDB.

Software Engineer & Consultant // Rooster Park; Seattle / Remote

2015 - 2018; 2022

Clients: Redfin, DoubleDown Interactive, Artefact, 98point6

- **Redfin, Brand Awareness team (11.2017 - 06.2018):** performance, accessibility, **SEO**, and test coverage, from the homepage through reusable site-wide components.
- **Redfin (10.2015 - 12.2016):** built Redfin's first React components and the foundation of its component library; rebuilt customer-facing pages including /why-redfin, /real-estate-agents, /why-buy, and /why-sell, plus a 15-page Jobs section.
- Delivered React/TypeScript work for 98point6, DoubleDown Interactive, and Artefact.

Partner // Adult Web Network

Early 2000s

A network of roughly 20 adult web properties built and run with one partner, including freepicspage.com.

- Grew revenue from **\$0 to \$240K in two years** through affiliate marketing and geo-targeting.
- Oversaw site design and development, **SEO, SEM, purchased traffic, and link development** across the network.
- Ran categorized content directories, gallery submission programs, traffic-exchange and ranking systems, and search-oriented site structure.
- Sold advertising inventory, split-tested designs and advertising, and built custom analytics reports to guide spend.

SELECTED PROJECT

muffinpanrecipes.com // independent project

2026 - present

- Built and operate a live recipe site. It began as an experiment in using AI APIs to build a cast of characters who talk to each other, and each weekly recipe includes a conversation among them; verified in **Google Search Console** with an XML sitemap submitted.
- Sitemap generated from the catalog rather than checked in, since the site publishes new listings weekly; tests cover the empty and corrupt catalog cases.
- Implemented **Recipe and BreadcrumbList structured data**, homepage markup identifying the site and its publisher, self-referencing canonicals that resolve duplicate URL paths, and Open Graph and Twitter cards.
- Audited with **Screaming Frog** and **Ahrefs Site Audit**; site instrumented in **GA4**.

EDUCATION & TRAINING

Web Development and Programming // Seattle Central Community College,
2010 - 2012

BFA, Ceramics and Sculpture // University of
Washington
